

*We are professionals with extensive experience in Health Information Technology and Health Practice Management*

### ***OHP Consultative Approach***

#### **Assessment**

- Assess your practice environment
- Assess your practice workflow

#### **Design**

- Design hosting solution that meets your needs
- Perform data conversion if migrating from existing EMR/EHR

#### **Deploy**

- Deploy OpenEMR instance that meets your requirements
- Configure OpenEMR to meet your unique practice needs and specifications

#### **Monitor**

- Monitor the environment for performance and scalability
- Perform routine maintenance including daily backup of your data

In addition to these four elements, OHP's Consultative Approach provides many more individual services.

### ***Leveraging The Experience of OHP's Team***

OHP provides a comprehensive enterprise scale end-to-end OpenEMR services that scale as your practice grows. Our expertise and knowledge can help you provide a better, effective, and efficient patient-care management to your patients.

*To sign up please visit <https://openhealthpractice.com/signup.php>*

*OpenHealthPractice provides secured, safe, and HIPPA complaint hosting for OpenEMR - an ONCHIT certified for "meaningful use" free open source software.*

## Highlights

- Fully featured electronic health records
- Integrated Practice Management System
- Appointment and Schedule Management
- Secure HIPAA Compliant open source EMR
- Multiple Facility Support
- E-Prescribing Module
- Electronic Billing Support
- Integrated Accounting Module
- Patient Document Management
- Custom Coding Support
- Multilanguage Support

### OpenHealthPractice Added Value

- No onsite IT infrastructure required
- Dedicated EMR instance
- Proven and flexible implementation
- 24/7 Monitoring and disaster recovery for business continuity
- Extensible and scalable based on your specific practice needs
- Email/online/phone support
- Training and education for staff members
- Data conversion from other EMR/EHR software
- Workflow customization to meet your unique process needs
- Templates/Forms development to meet your practice needs
- Data analytics for better insight and decision making
- Secure hosting in HIPAA and SSAE 16 (formerly SAS 70) certified and compliant facilities

OpenEMR is fully integrated and provides effective healthcare management practices by converting complex medical records management process into a simple organized process, tailored to your needs. OpenEMR provides the following features to increase productivity and efficiency:

- Turnkey solution - everything is configured and setup
- Stronger Practice Management modules
- Fee Sheet: template-based and per-provider
- Patient Ledger
- Customizable Reports
- Modules for many specialities including General Practice, Psychiatry, and others
- Integrated ePrescription, Lab-exchange, and Patient Portal

### HIPAA Compliant

OpenEMR complies with HIPAA regulations and mandates:

- Time-based automatic logout with terminal inactivity
- Physician authorization of staff-entered patient data
- Group-based user categorization
- Extensive logging of patient data changes
- Patient-requested removal of personal data
- Comprehensive patient file printable reporting

### Scheduling

OpenEMR offers scheduling and calendaring features that allows better management of patients' appointments. The calendar allows viewing of appointments on a daily/weekly/monthly basis including appointments for an entire facility or multiple facilities. Other features such as color coding, automated email and text messages reminders enable better information communication with patients.

### Customizable Charting Forms

OpenEMR provides customizable forms that allow you to choose what is required in the form for data entry. New forms can be developed and customized to fit each provider's needs at minimal or no costs.

### Electronic Prescribing

OpenEMR electronic prescription or ePrescription feature facilitates faster delivery of medicines, refills, and eliminate errors associated with hand writing prescription forms thus making it reliable and safe. The ePrescription module includes the ability to print or transmit prescriptions electronically.

### Lab Exchange

OpenEMR provides the capability for laboratory result integration that clinicians can view as part of patient record. Tracking previous investigations, comparing them and determining the efficiency of the treatment plan simplifies patient care follow up and progression.

### Patient Portal

OpenEMR patient portal provides a direct link between the provider and the patient. Patients can access their medical records directly, sign documents, set appointments, and make payments, either online or through a kiosk set up at the provider's office.

## Why Would a Provider Choose OpenEMR?

### An Open Alternative

- An **open source alternative** to other EMR/EHR solutions

### A Smarter Choice for Clinicians

- Lower total cost of ownership
- **Enterprise-class** performance, scalability and security
- Technical leadership and business agility through **open source development community**
- **Open:** Avoids vendor lock-in
- **Ecosystem** of healthcare applications integrations

Our consultative hosting model allows us to have a thorough understanding of your practice which enables us to provide the best in class hosting service for you.
